Subject: bristol bay assessment

Hi - I received notice this morning about your proposed assessment of the bristol bay because of the potential impact of large scale developments on the salmon fishery. I work for NewFields LLC and we are assisting the state Department of Health and Social Services to write Health Impact Assessments for large scale development projects in Alaska. We are not currently working on any projects in the Bristol Bay watershed but have had recent contact with several tribes who are interested in learning more about health impacts of changes in their subsistence life styles - particularly concerning impacts on salmon fishing due to a proposed coal mine in the Cook Inlet. I'm wondering if including a health overview would strengthen the focus of your report. Please let me know if you would like anymore information about our services.  
Cheers  
Karen Lyncoln
